

Fact sheet – DAS Professionals

Tel Force Group, is a provider of Human Capital in the distributed antenna systems- (DAS) industry providing contract, temp to perm and perm placements - (manpower) who can, design, build and operate network infrastructure as a supplement and/or alternative to traditional tower and macrocells deployment for wireless service providers.

Benefits of DAS networks are flexible, scalable and in keeping with any community's sense of aesthetics. DAS networks help deliver performance improvements that include stronger signals, fewer dropped calls, better sound quality and quicker data transmission. DAS networks are implemented quickly and efficiently in outdoor and in-building environments.

TelForce works with DAS owners for distributed networks that are designed to facilitate and delivery of high-bandwidth mobile data and voice service supporting all wireless technologies including 4G/LTE. TelForce supports our clients to take a pragmatic and comprehensive approach to designing and building distributed networks.

Higher Education & Commercial Real Estate | TelForce helps universities deliver access to campus-wide wireless coverage that provides service seamlessly between indoor and outdoor use. The university's faculty, students and visitors benefit from an distributed network for use by wireless carriers.

Landline service is disappearing while smart phones dominate campus life and use of data and video is exploding. DAS network infrastructure for the wireless industry can immediately expand safety for students, staff and faculty by improving alert and emergency messaging applications. Distributed networks also work well for stadium coverage—where peak capacity is required on game days. The network infrastructure also is flexible and scalable for the future to accommodate e-education.

Hospitality & Health Care | TelForce works with top-tier hotels and convention centers to serve access to better wireless connectivity in guest rooms, conference facilities and public spaces. Today's business and leisure guests have a lot in common. They want the comforts of home such as wireless technology in their hotel and meeting rooms. But the improved technology is not limited to the use of guests. It's also being used for many hotel applications to improve operations and reduce costs, such as wireless kiosks for customer check-in and checkout and handheld devices to communicate with housekeeping staff.

Sports & Entertainment | TelForce works with indoor and outdoor stadiums, arenas and entertainment venues to deliver improved access to wireless connectivity. Venues need to provide customers, the media and employees better access to mobile communications throughout the facility.

Fans use smart phones and tablets to interact with friends inside and outside the stadium. The benefits for venue owners include satisfied ticketholders, more effective safety and emergency communications, ease of merchandise and concession purchases and potential increased revenue from mobile applications. DAS systems works with many indoor and outdoor stadiums and entertainment venues to deliver better access to wireless connectivity, improving the visitor experience.

Benefits of DAS

1. Multiple activations
2. Rapid deployment to market
3. Leverages existing equipment
4. Provides flexibility and scalability
5. Maintains community aesthetics
6. Improves uptime and reliability

RF Engineering Services

- Drive test
- Design
- Support – Resource based

iDAS

- Small Cells

oDAS

- Small Cells

Cell Site Civil, Management Services

- Site Acquisition
- Zoning
- A&E Management
- Construction Management

Integration Services – EF&I

- Radio and cabinet adds and Modifications
- Commissioning & Integration Services
- Decommissioning and Recovery
- Operations and Maintenance
- Field and Switch
- Warehousing
- Data Integrity
- Cable/wiring
