

fact sheet – VAR & OEM Staffing Services

Tel Force Group, is a provider of Human Capital in the VAR & OEM Technology industry providing contract, temp to perm and perm placements – human capital who can, design, build and operate network infrastructure as a supplement and/or alternative to traditional hiring needs.

Certified OEM Professionals

Education. Training. Networking. Knowledge = Certifications-These are the hallmarks of TelForce Group to bring you certified OEM professionals nationwide. TelForce offers a range of comprehensive programs and nationwide technical searches to expand your companies professional expertise and improve your company's performance. Our nationally recognized credentialing program identifies individual excellence in house evaluation selection process based on our client standards. Certifications are earned from an OEM professional society, university, or from a private certifier, for some specific certifications Microsoft, Cisco, Alcatel, Juniper and many other telecom certifications. This enhanced certified candidate is more credibility with employers, clients, and peers that improve your ability to compete in the market • potential for increased sales and other benefits. Publicly recognition in the architectural/ engineering/installation and construction community.

Central Office EF&I – DC Power

TelForce provides qualified central office EF&I - DC Power technicians who know how to set up, rearrange, and change communications equipment associated with the complex switching and dialing operations vital to telecommunications central offices. Versed in equipment work order information, blueprints, circuit diagrams, and floor plans, our installers are qualified to set up new central offices, add equipment to existing offices, and replace outdated equipment. Our EF&I technicians can test each piece of equipment, troubleshoot failures, and correct the problem. Our DC Power leads and technicians have documented central office experience in writing MOPS, reading detailed SOW's and specs , installing iron work, doing hot cuts, transition work and in handling a wide variety of rectifiers and batteries.

Data centers, Cable Companies, Utilities, Government / Education-Universities to Public Safety & Hospitality

From initial consultation and preliminary planning through construction of distribution plant, installations, and final proof-of-performance testing, TelForce can provide you with experienced personnel who possess a thorough working knowledge of networks, inside plant to outside plant, local

access transport networks, optical technologies, ILEC, CLEC, equipment vendors, LEC collocation and inter-connection to ensure seamless project delivery. Data centers, Cable Companies, Utilities, Government & Schools/Universities are just a few of the environments we can work in.

DAS & Small Cell Solutions

The Next Big Thing in Mobile Communications: Think Small!The BIG and Ugly-“big and ugly,” none of us want a traditional cell tower in our back yard. But we DO want immediate access to the video, voice, and data communications afforded us by our smartphones. So without those metal monoliths on our skyline, how do we stay plugged in to the brave new world of rapid data exchange? Coverage and Capacity for Less- Small cells offer mobile service providers (MSPs) a cost-effective alternative to macro-only deployments for meeting growing coverage and capacity demands. That's because as small, low-cost access points, they are self-installed (home and enterprise cells) or easily installed by a single person (metro cells). Plus, as small cells are added, they offload traffic from the macro network. This increases available network capacity without the deployment of new macro sites.

VAR & OEM Solutions

Equipment & Software companies or major systems providers, who sell In-between in conjunction with their own solutions turn to TelForce for Human Capital Solutions. The aim of VAR/OEM Partners is to supplement their own solutions with specialized publishing functionality without having to make their own investment in developments in this field. According to the degree and depth of integration, as a rule the status of Value Added Reseller is initially awarded, which can then be extended within the framework of the partnership and by additional steps for using In-between through to use as an own module as an OEM Partner. TelForce offers Education. Training. Networking. Knowledge = Certifications – **These are the hallmarks of TelForce Group to bring you certified Human capital professionals nationwide.**
